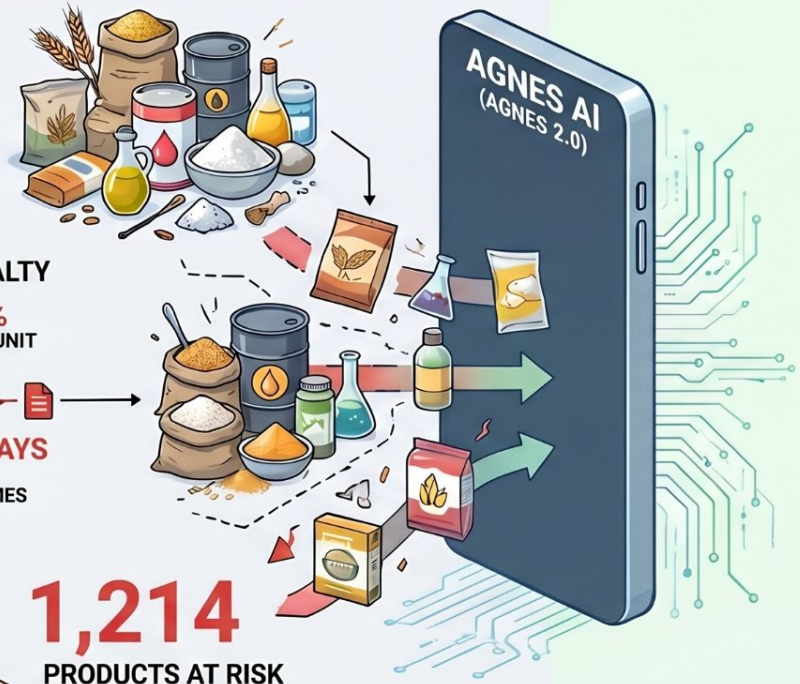
Agnes AI: Solving the $1.8 Trillion CPG Fragmentation Crisis

THE PROBLEM: Fragmented Sourcing

143

HIDDEN COMMONALITIES

Across 60 companies, 143 ingredients are purchased independently, wasting massive collective buying power.



THE "VISIBILITY GAP" PENALTY

5–15% HIGHER UNIT COSTS

3–7 DAYS LONGER LEAD TIMES

1,214

PRODUCTS AT RISK

Over a thousand finished goods depend on these fragmented, often single-sourced ingredient supply chains.

THE SOLUTION: Agnes AI (Agnes 2.0)

AI SUBSTITUTABILITY & EVIDENCE TRAILS

Gemini Flash parses messy SKUs and external data to justify substitutions with tracsable facts.

COMPLIANCE-FIRST GUARDRAILS

System automatically rejects consolidations that lack critical certifications like USP, Halal, or FDA registration.

233%

PROJECTED 3-YEAR ROI

Portfolio-wide consolidation can deliver $5M in annual savings and a 2.4-month payback period.

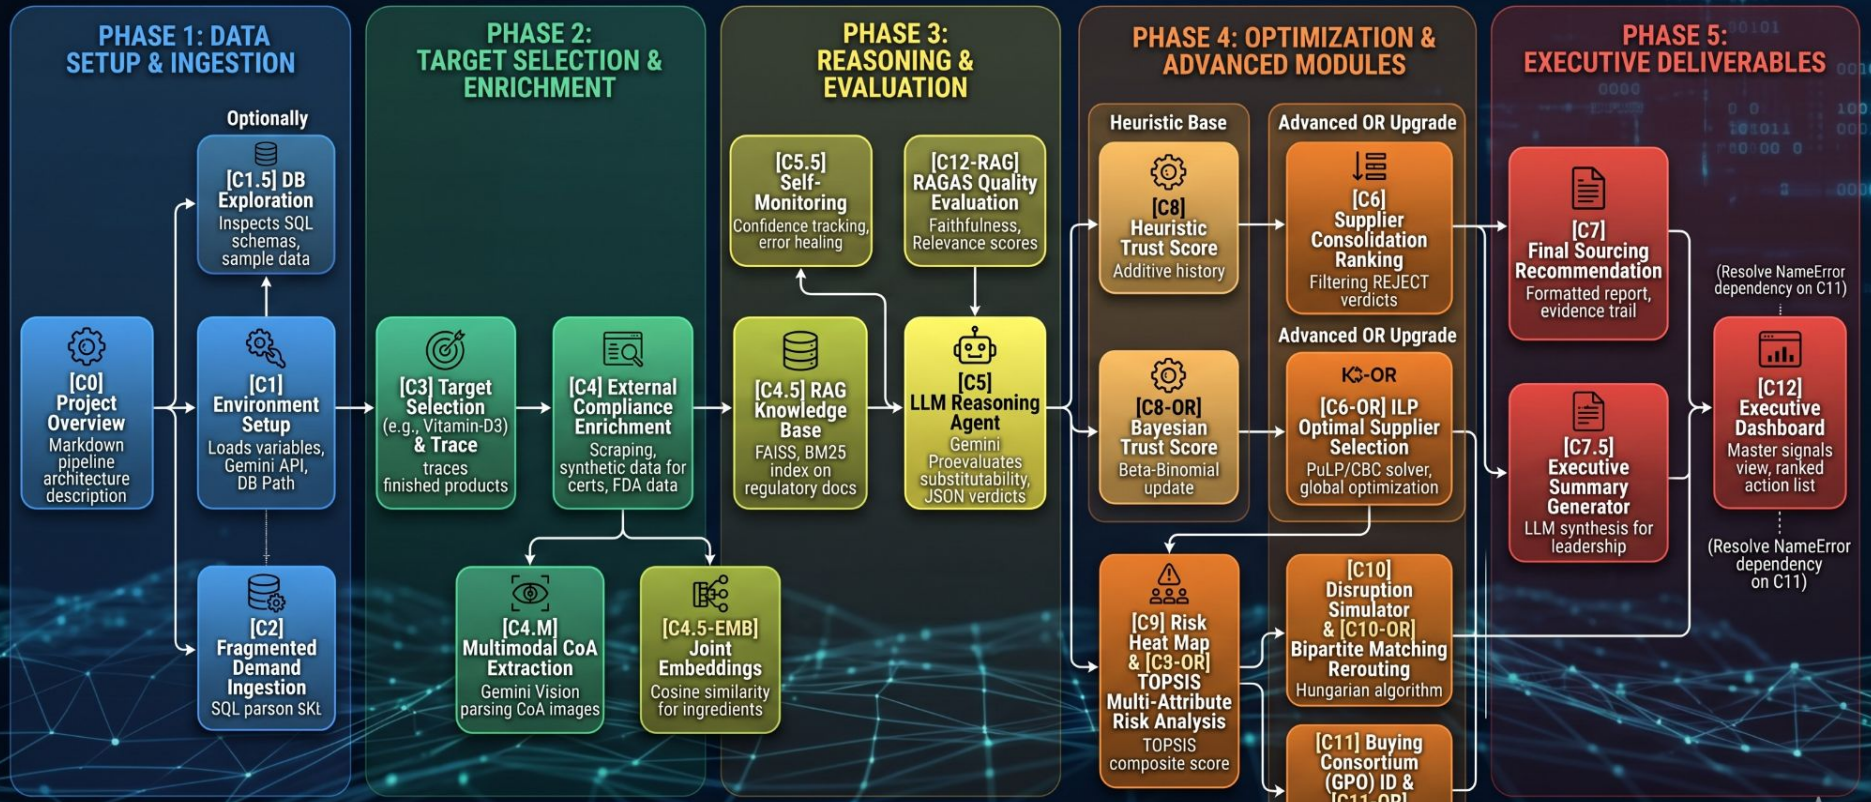
AGNES 2.0: AI SUPPLY CHAIN PIPELINE ARCHITECTURE

A RAG-Augmented Decision-Support System for CPG Companies



Agnes AI: Unifying the Fragmented CPG Supply Chain

The Fragmentation Challenge

143 Shared Ingredients at Risk

60 CPG companies independently purchase identical ingredients across 1,214 distinct product formulations (BOMs).

Hidden Supply Chain Vulnerabilities

18 critical ingredients currently rely on a single supplier, creating high-exposure failure points.

The "Zero Leverage" Problem

Fragmented orders result in 5–15% higher unit costs and 3–7 day lead time penalties.
